- Noble material : an entirely aluminium anodized black control handle
- Latest generation of optics quality used for the lenses
- 4 robust layers insertion tube designed with tungsten
- High performance articulation angles : up to 160°
- Versatile optics thanks to interchangeable optics. Forward view: 0° & FOV: 120° 90° side view & FOV : 40° or 120°
- Made in France quality label

Choose the right probe for your inspection

FORT can manufacture customized probes

Ø (mm)	Length (m)		
3,7	1,1	2,2	
6	2,2	3,3	6,6

VISIO BOX

THE INSPECTION PROCESSOR

The VISIO BOX is a compact and very lightweight inspection processor (740 g). The VISIO BOX solution allows you to perform a simple visual inspection solution until a high-performance inspection solution. Thanks to its attractive price, you will save time and money in your remote visual inspections.

THE CHOICE OF VERSATILITY

- System without forced ventilation which permits to operate in harsh and confined workspaces
- Versatile system due to 2 video outputs (BNC and Y/C)
- High-end design with noble materials : aluminium box and, carbon front
- Made in France quality label

VISIO BOX

The convenient inspection solution

The VISIO BOX was specially designed for the industry, and more precisely for the hazardous areas. Its design is very compact, lightweight and very handy. All the products of the VISIO range are compatible.

Adjust the white balance to obtain a perfect color rendering

A user-friendly, ergonomic and intuitive inspection processor

Perfectly suitable for visual inspections in hazardous areas (plants, foundries, etc.)

VISIO DOC

THE MULTIMEDIA CASE

The VISIO DOC allows you to visualize your inspection in live, to save your visual inspection data and also to export for analysis.

Benefit from a compact and a portable system perfectly suitable with the industry. The VISIO DOC is operating on **battery** and on the mains.

The 3 in 1 compact solution

changeable probe
for your application

MADE IN France QUALITY LABEL

All the products of the VISIO range are made in France, by our experts who use their know-how to produce high-end material.

THE PERFORMANT AND COST SAVING SOLUTION FOR YOUR REMOTE VISUAL INSPECTION NEEDS

ALWAYS MORE LIGHT

Color temperature over 6000 kelvin (which allows to get a very white light). The LED is 180% brighter than the former generation thanks to the hybrid LED / fiber optics technology.

IMPROVED OPTICS

The VISIO PROBE benefits from a high resolution video quality thanks to the use of the latest CCD HAD technology.

DESIGNED TO BE ROBUST

Entirely made in France thanks to our know-how and the strong collaboration between the clients and FORT, the probes performance is constantly improving. Its robustness is a result of the use of high-end material such as carbon and aluminium.
