We repair  
your VUMAN/  
your VUMAN probe  
within 3 weeks!

Call us:  
+49 7432 98375-0

***That's how it all started in 1997*** – with the repair of video endoscopes.

Until today, repair service has remained our strength. The early and deep involvement in the use of inspection cameras has granted us insight in typical weaknesses of inspection cameras. We used these years of experience to develop especially robust and repair-friendly endoscopes, as well as to develop countless custom solutions for especially demanding inspection requirements.

#### Our Service Promises:

- product repair, modification and upgrade
- transparent, cost-efficient repair service: we avoid the replacement of entire assemblies and repair/replace only the defective component
- short repair times and rental service
- on-site-repair service, including containment in nuclear facilities
- despite the evolution of our products we attempt to still offer service for old and discontinued systems
- repair of foreign camera systems

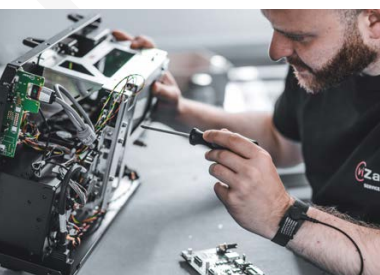

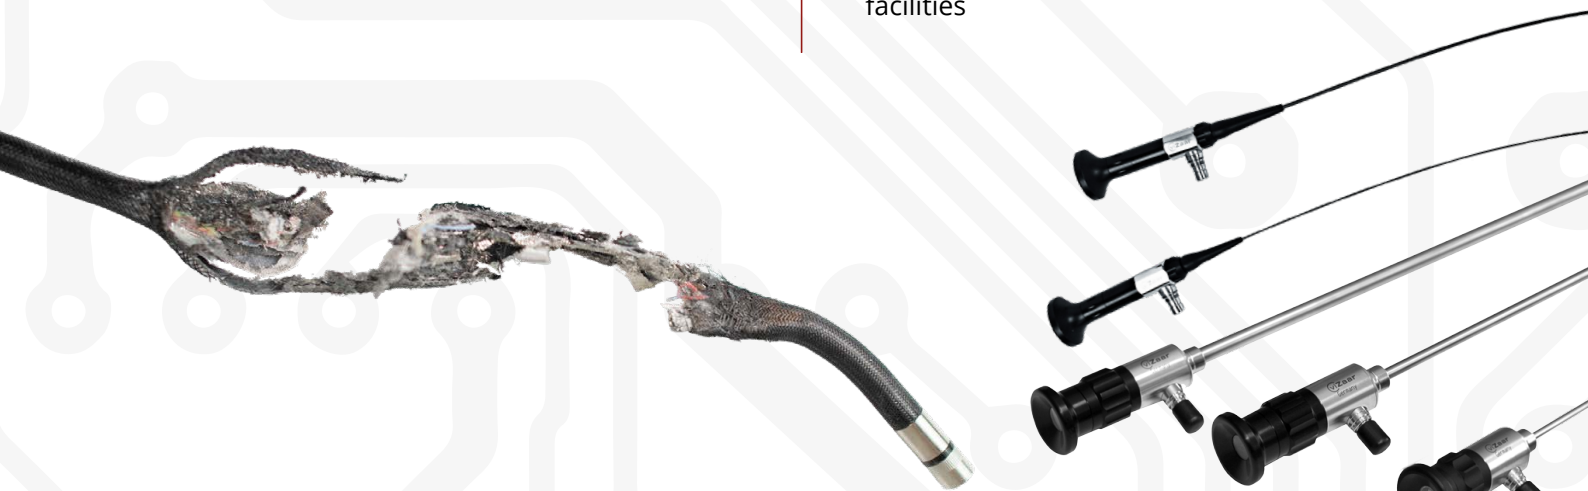

#### Our Quality Promise:

- high quality components from Germany
- 6-month warranty\* on the repair of viZaar products
- certified according to DIN EN ISO 9001, DIN EN ISO 14001, SCC<sup>P</sup> und KTA 1401

\*Excluding parts subject to wear. Warranty on repair work does not prolong the general warranty on the whole system.

#### Hot Shop Repair Service

- we have the necessary experience, knowledge and authorization to perform repair work in nuclear facilities
