That's how it all started in 1997 – with the repair of video endoscopes.

Until today, repair service has remained our strength. Through early and deep insight into the use of inspection cameras, we have gained years of expertise in the development of particularly robust and repair-friendly endoscopes. As a result, we are passionate about developing customised solutions for particularly demanding testing requirements. This is the cornerstone to our promise of service and quality made in Germany:

Our Service Promises:

- product repair, modification and upgrade
- transparent, cost-efficient repair service: instead of replacing entire assemblies, we repair/replace the defective component
- short repair times and rental service
- on-site-repair service, including containment in nuclear facilities
- despite the evolution of our products we attempt to still offer service for old and discontinued systems

Our Quality Promise:

- high quality components from Germany
- 6-month warranty* on the repair of viZaar products
- certified according to DIN EN ISO 9001, DIN EN ISO 14001, SCCP and KTA 1401

*Excluding parts subject to wear. Warranty on repair work does not prolong the general warranty on the whole system.

Hot Shop Repair Service

- we have the necessary experience, knowledge and authorization to perform repair work in nuclear facilities
